

PEG is an Independent Engineering Consultant based in Geneva, specializing in Cement, Environment and Infrastructure projects. The head office in Geneva of approximately 40 people, mainly engineers from various disciplines and nationalities, offers a dynamic and international working environment.

At PEG we manage all phases of a project from the initial concept, engineering design, equipment procurement, project execution and commissioning, operational assistance right through to sourcing of finance and managing the plant.

We are able to use these subsidiaries in order to not only satisfy, but to surpass the standards of professionalism and commitment. Furthermore, PEG has a commitment to provide independent expertise, global experience, technical sophistication and commercial focus, making PEG the world's leading independent cement engineering consultancy in the world.

In order to join our Technical team, we are looking for a

Project Manager With an experience in cement

Job Description:

You will be part of the Technical Team, with direct reporting and cooperation with the Projects' Director.

You will be the customers' privileged contact in terms of the necessary support to deal with technical or administrative issues and to optimize the progress of the project.

You will act as a team leader of a multidisciplinary team of experts and engineers (mechanical, civil, process, electrical, geology...) and will be responsible for the daily operations of your project(s):

- Responsibility and supervision of large scale capital projects from conceptual through commissioning stages (more than 40 millions €)
- Direct participation into the projects' execution according your field of competency;
- Planification of the resources needed for the execution of the project;
- Coordination of the project's execution with the different participants (the PEG project team, the outsourced services providers, as well as the PEG international affiliates);
- Management of the site activities in tight collaboration with the Site Manager;
- Representation of PEG in various projects' meetings with the clients as well as international equipment manufacturers or service providers;
- Financial follow-up together with the Financial Controller (invoicing, payment, analysis of the budget's evolution, ...);

The job involves frequent travel abroad (upto 40%). You must be open to temporary site assignment outside Switzerland.

Profile:

- Experience in the management of large projects;
- Similar position in Project Management during 10 years minimum;
- Knowledge of the cement industry (equipment, process, ...);
- Skill and strong personality keen to follow-up project teams and site activities;
- Excellent analytical and organization skills;
- Problem resolving aptitude, "can do" attitude and team player;
- Excellent communication skills and report writing skills;
- Possessing English and French communication skill both writing and speaking. Additionally, other language will be appreciated;
- Microsoft Office capability is required and MS Project capability needed.
